PROFILE

Software Engineering graduate (QUT, GPA 5.2) with hands-on experience turning operational data into business insight across utilities, consulting, and software environments. Built Power BI dashboards and Python automation scripts for a critical-infrastructure operator (APA Group) and now apply analytical and stakeholder skills to technology assurance at Deloitte.

EDUCATION

Bachelor of IT and Business, Majoring in Computer Science and Finance, Queensland University of Technology - 2025

Coursework: Machine Learning, Data Structures and Algorithms, Software and Systems Development, Database Management, Financial Analysis, Student Managed Investment Fund

PROFESSIONAL EXPERIENCE

Graduate Technology Risk Analyst

March 2026 – Present

Deloitte • Brisbane, QLD • Technology Assurance

- Analysed IT general controls and technology risk data across critical business systems, identifying control gaps and supporting evidence-based remediation activities.
- Collaborated with stakeholders across IT, operations, and risk teams to improve governance, compliance, and process efficiency.
- Leveraged AI and digital tools to streamline testing workflows and improve reporting accuracy.
- Supported delivery of technology assurance activities within fast-paced, multi-stakeholder environments.

Software Developer

Mar 2025 – November 2025

Orefox AI • Brisbane, QLD

- Built a GIS-based spatial analytics platform using Django and Python to support real-time asset tracking and layout planning for agricultural operations across Queensland.
- Gathered and translated stakeholder requirements into practical software solutions, improving usability and data accessibility for non-technical users.
- Enhanced UI/UX and reporting functionality through iterative development and end-user feedback.
- Worked collaboratively within agile development environments to deliver scalable and data-focused technology solutions.

Intern - Operational Technology Analyst

Nov 2023 – May 2025

APA Group • Brisbane, QLD

- Developed interactive Power BI dashboards to monitor operational KPIs and support proactive, data-driven decision-making for senior engineering and operations stakeholders.
- Automated operational data pipelines using Python and Bash scripting, improving engineering productivity and data availability by 20%.
- Designed and implemented a Power Apps workforce scheduling solution that improved coordination and reduced operational conflicts across teams.

KEY PROJECTS

AgDesk — Geospatial Farm Planning Platform *(QUT Capstone)*

- Full-stack geospatial planning tool (Django, Leaflet.js, HTMX, PostgreSQL) enabling interactive paddock design and analysis — owned end-to-end from requirements through spatial query optimisation.

DEEP PATEL

Obstacle Odyssey — CLI Path-Finding Game *(Personal Project, C# / .NET Core)*

- Built an interactive command-line path-finding game in C# applying core OOP principles (inheritance, polymorphism, abstraction) and a modular class architecture. (GitHub: github.com/deep Patel-68/cli-path-finder-game)

VOLUNTARY CONTRIBUTIONS

Public Relations Manager | BAPS (Bochasanwasi Akshar Purushottam Swaminarayan Sanstha)

2019 – Present

- Lead weekly children's engagement activities and coordinate volunteer operations.
- Managed a 40+ member volunteer team during major cultural events attended by over 700 participants.
- Developed strong leadership, communication, stakeholder engagement, and event coordination skills through community-focused initiatives.

TECHNOLOGY & SOFTWARE EXPERTISE

Programming & Frameworks: Python, SQL, JavaScript, C#, HTML/CSS; Django, React, Node.js, PostgreSQL, Git

Data & Analytics: Power BI, SQL, Python (Pandas, NumPy), Data Visualisation, Machine Learning

Digital & Automation Tools: Power Apps, Process Automation, Amazon Web Services

REFEREES
